

## S7 IP cameras by TruVision

More details, day & night

A new series of TruVision IP cameras to match the evolution of our customers' needs: this is our commitment.

### What is the S7 IP camera series?

The S7 series is the successor of the S4 IP camera series. It is the latest addition to the TruVision IP cameras portfolio. You will experience the details even in very low light conditions with S7 cameras thanks to their excellent performance, sharp precision, ease of use and customization.

Here is how S7 brings you these benefits.

### Key features

- **Extreme** low light sensitivity
- **Up to 12MP** resolution
- **2.8-12mm** and **8-32mm** lens options
- **IR range** up to **100m** (8-32mm bullets)
- **Plugin-free** browser support
- **P-iris** feature: more precision for optimized video
- **Extra features** such as analytics, 10 configurable video streams, and more!
- **Outdoor** models IP67/IK10

### What makes the S7 series stand out?

#### PERFORMANCE

##### Excellent contrast

- Brilliant picture quality 24/7 in any lighting environment, even the most challenging
- Exceptional low-light sensitivity
- High quality images with state-of-the-art image processing technology

#### PRECISION

##### An ideal solution for demanding projects

- For our sharp customers with an eye for details: **up to 12MP** resolution cameras
- Crisp images with optimized depth of field of the camera with P-iris lens

#### EASE OF USE

##### Seamless installation experience

Quickly adjust the camera at installation with the motorized **zoom/autofocus** lens in bullet and dome cameras

#### CUSTOMIZATION

##### More options, more flexibility

- A rich feature set including direct access to the camera settings, ePTZ on the 4th camera stream, extra alarm input/output, dual file system and many more!
- A wide choice of lens options based on different needs

## The new S7 series of IP cameras, who is it for ?

The S7 IP cameras can be used for a variety of applications and they are best suited for demanding video applications like shopping malls, large commercial buildings, parking, factories, warehouses, airports, etc.

Bullet and dome cameras are IP67 and IK10 rated while additional indoor dome variants are available too.

The box cameras can be used outdoors in combination with outdoor housing TVC-OH3-HT with integrated IR light that can be controlled by the camera's RS-485 connection.

The S7 series comes in all camera form factors: box, bullet, dome, and includes models for the inside and the outside environment.
